## Winter Presentation

### Water for Millions: How the Catskills Keep New York City Alive

Between 1905 and 1965, New York City transformed the Catskills by creating six great reservoirs and several gigantic tunnels to move mountain waters to the city's millions. Join us to explore how this engineering marvel was accomplished, and what it cost, in lives, treasure, and legacies lost. The program will also discuss the measures being taken today to preserve a living watershed

**Presenter Diane Galusha** is the author of *Liquid Assets: A History of New York City's Water System* and several other books of local and regional history. Until her recent retirement, she served as communications director and education coordinator with the Catskill Watershed Corporation.

**Date:** Wednesday, February 5, 2020

**Time:** 11:00 am -12:30 pm

**Place:** Community Room  
Saugerties Public Library  
91 Washington Avenue

To reserve a seat, please email Susan Davis at [Davissu@Vassar.edu](mailto:Davissu@Vassar.edu) or [Lifespring.saug@gmail.com](mailto:Lifespring.saug@gmail.com)

The deadline for reservations is **Friday, January 31st.**

If you are bringing a guest, please include your guest's name in the reservation.

Reservations are on a first come, first served basis.

We look forward to seeing you.
